

## Legacy Electronics Elected New Member of the Association of Gaming Equipment Manufacturers

December 17, 2014 12:19 PM Eastern Standard Time

SIOUX FALLS, S.D.--([BUSINESS WIRE](#))--[Legacy Electronics](#), a USA manufacturer of computer products, was selected for membership in the [Association of Gaming Equipment Manufacturers \(AGEM\)](#). AGEM is a global non-profit international trade association representing manufacturers and suppliers of electronic gaming devices, systems, online technology, key components, table games, support products and services for the gaming industry.

“AGEM is pleased to add Legacy Electronics to our membership of the world’s leading gaming suppliers,” stated Marcus Prater, AGEM executive director. “The members of AGEM work together through political action, educational alliances, information dissemination, and good corporate citizenship to solve problems and create benefits for our member’s companies,” he said.

“For over ten years, Legacy has supported the gaming industry by supplying our long-life computer memory subsystems, dynamic RAM, and now Intel’s next unit of computing (NUC) for slot and gaming machines,” said Jason Engle, CEO of Legacy Electronics. “AGEM’s network of members is a who’s who of the supplier segment of the global gaming industry. We are proud to have been selected as a member of this association and have the opportunity to participate in their activities,” he added.

### About Legacy Electronics

Legacy Electronics offers a full line of flash-based SSD products, and specializes in mSATA (MO-300A), Half-Slim (MO-297) and standard 2.5” drives.

Headquartered in South Dakota, Legacy Electronics is a woman-owned, U.S.-based, ISO 9001:2000-certified contract manufacturer, designer and tester of high-speed, high-density memory modules, printed circuit boards, and other computer products. Legacy Electronics holds several patents and trademarks, including those for its Canopy® chip-stacking process technology, and its Multiple Device Canopy® (MDC®) for embedded computing and high-density VLP (very low profile) modules.
