NEW 4GB FULLY BUFFERED DIMM FROM LEGACY ELECTRONICS RECEIVES CMTL CERTIFICATION

SAN CLEMENTE, CA - - February 27, 2007 - - Legacy Electronics, a leading memory module designer and manufacturer, announced today that its new 4GB DDR2/667 fully buffered (FB) dual in-line memory module (DIMM) has been tested and certified compatible for Intel® applications. The 4GB FB DIMM met Computer Memory Test Labs' (CMTL) compatibility, reliability and performance requirements on Intel's S5000 PSL, PAL, XVN and VSA series motherboards.

Jason Engle, Legacy Electronics' president, said "We believe we're the only independent memory module manufacturer to be validated for our 4GB monolithic design and certified to work on Intel chipsets. This CMTL certification provides our customers with the added assurance of compatibility and increased performance. With Legacy, they also get reduced costs."

(continued)

More Information

The newly certified 4GB DDR2 FB-DIMM is available now in 100-unit quantities at \$895. More information is available by contacting Legacy Electronics. For details on worldwide sales representatives and distributor locations, go to www.legacyelectronics.com/corporate_contactus.php, call 949-498-9600, or toll-free at 888-466-3853.

About CMTL

Computer Memory Test Labs (www.cmtlabs.com) is the leading independent compatibility test lab in the electronics industry. The company performs over 1,800 different memory module compatibility tests annually for module manufacturers worldwide.

About Legacy Electronics

Founded in 1993 and located among the new high-technology companies of South Orange County, California, Legacy Electronics is home of the patented Canopy® chip-stacking alternative, a three-dimensional printed circuit board subassembly and process technology. Legacy also manufactures the low-form-factor Point Seven™ memory module product line.

Legacy Electronics is an ISO 9001:2000 certified manufacturer, designer and tester of high-speed, high-density memory modules, printed circuit boards, and other computer products. All Legacy Electronics memory modules are RoHS* and EWRA* compliant.
